fully recyclable no compromise pocket springs

APEX PRODUCT RANGE

Design

Apex springs are designed for comfort, durability and breathability. Advanced engineering ensures they provide optimal support and comfort. The breathable design helps maintain a cool sleeping environment making them an ideal choice in any product.

Specify

Apex is exclusively made in our UK facility in South Yorkshire. Offered in a wide range of series to specifically meet diverse preferences and needs, we ensure our customers can find the perfect Apex spring for their product.

Produce

Containing 80% recycled steel, Apex enhances strength and durability while reducing waste and supporting a circular economy. Manufactured in our facility fully powered by renewable energy ensuring a sustainable high performing product.

Recycle

Apex is fully recyclable and utilises a polymer based glue, reducing the materials to just steel wire and polypropylene. This minimises environmental impact as the non-woven fabric only comes into contact with compatible substances.
