

WOLF

VSS PRODUCT RANGE

The independently enclosed springs reduce motion transfer and can be used in unlimited combinations to increase resilience and comfort. The sheets assist with improving air circulation and can be layered as a cost effective solution to boosting overall mattress coil counts.

Made from only two raw materials the product is fully recyclable and proudly manufactured in the UK.

1000 Series

Our latest mini spring sheet with an increased 30mm height giving a resilient and comfortable feel whilst minimising settlement.

1500 Series

One of our most popular springs, it offers a range of possibilities to give exceptional comfort and support. With a 20mm height it is ideal within pillow type products or can be used within the main mattress body to create multiple layers

2000 Series

Our original VSS mini spring, with a 20mm height, it offers a cost-effective solution to replace foam and fibre layers and deliver improved air circulation throughout.
